CONSTRUCTION & DEVELOPMENT REGULATIONS

Whereas, after repeal of the Defence Housing Authority Lahore Ordinance 1999 (Punjab Ordinance LI 1999), Chief Executive's Order No. 26 of 2002, for the reconstitution of Defence Housing Authority Lahore, has been promulgated and published in Gazette of Pakistan dated September 19, 2002.

And whereas, the Executive Board of the Defence Housing Authority (DHA) is empowered to make Regulations under Article 23 of Chief Executive Order No 26 of 2002 and to get them published in Government Notification in the Official Gazette.

And whereas, the Executive Board in order to carry out the purposes of the order and in exercise of its powers conferred upon under Article 23 Read with Article 4 and all other enabling provisions of the said Order is pleased to make the following Regulations.

CONSTRUCTION & DEVELOPMENT REGULATIONS

1. SHORT TITLE, COMMENCEMENT AND EXTENT

a. These Regulations shall be called Defence Housing Authority Construction & Development Regulations 2014.

b. These Regulations shall extend to the Specified as well as Notified area of Defence Housing Authority Lahore.

c. These Regulations shall come into force with effect from the date of publication in the Official Gazette and shall be read in consonance with Defence Housing Authority Projects / Joint Venture Regulations 2004 and vice versa.

d. If the house/building is constructed as per drawings approved on previous byelaws / rules / regulations which is contradictory to the present regulations, the violation may not be objected and completion certificate be issued accordingly.

2. DEFINITIONS

a. All expressions and definitions mentioned in the Chief Executive's Order No. 26 of 2002, for the reconstitution of Defence Housing Authority Lahore ("DHA Order") and other rules and regulations of the Authority shall also be treated as the part and parcel of these regulations.

b. The following expressions shall have the meanings hereby respectively assigned to them or as the context otherwise require:-

(1) **'Alteration'** of building includes the structural or other physical alternation for making any addition / removal or other changes in a building.

(2) **'Allotment Letter'** means a letter in such form as may be prescribed by the Authority from time to time making allotment of a particular property / plot to an applicant.

(3) **'Allotment / Allocation'** means the conveyance of a particular property / plot to an applicant by way of an allotment letter or transfer letter as prescribed by the Authority.

(4) **'Allottee'** means a person to whom an Allotment Letter has been issued by way of a method of conveyance as approved and / or permitted by the Authority.

(5) **'Amalgamation'** means the joining of two or more adjacent plots of the same land use in accordance with prescribed rules / regulations.

(6) **'Amenity Plot'** means a plot allocated exclusively for the purpose of amenity uses, such as government offices, health, welfare, education, worship places, burial grounds, parking and recreational areas.

(7) **'Ancillary Building'** means a building subservient to the principal building on the same plot e.g. servant quarters, garages and guardroom etc.

(8) **'Approved'** means as approved in writing by the Authority.

(9) **'Approved Plan'** means plan for the building or lay out plan approved by the Authority in accordance with prescribed regulations.

(10) **'Approved Scheme'** means a project duly approved for urban development, redevelopment or renewal, including larger area plan, area specified and notified for specific use, traffic control plans, housing and zoning scheme.

(11) **'Area of Defence Housing Authority (DHA)'** means the area of jurisdiction of Defence Housing Authority (DHA) as shown in the master plan of Defence Housing Authority & including any extension or modification affected therein, from time to time.

(12) **'Arcade'** means a covered walk-way or a verandah between the shops and the road or street on which the shops abut.

(13) **'Architectural Plan'** means a plan showing the arrangements of proposed building works, including floor plans, elevations and sections, in accordance with the requirements of the rules and regulations of the Authority.

(14) **'Attached Building'** A building which is joined to another building on one or more sides.

(15) **'Authority'** means the Defence Housing Authority (DHA), Lahore.

(16) **'Authorised Officer'** means any officer appointed and duly authorised by the Authority to conduct and accomplish such an act or acts or any other such thing as contemplated by the Authority on its behalf.

(17) **'Basement'** means the lowest storey of a building partially below ground level.

(18) **'Balcony'** means a roof or platform projection from the walls of the building surrounded with a railing or parapet walls.

(19) **'Bathroom'** means a room containing a water tap, wash hand basin and a shower or a bath tub or a bath tray, and may be with or without a WC.

(20) **'Buildings'** means a house, out-house flats, block of flats, latrine, privy, verandah, fixed platform, plinth, shed, hut or other roofed structure whether masonry, brick, wood, mud, metal or other material, and any part thereof, and includes a wall (other than a boundary wall not exceeding seven feet in height and not abutting on a street) but does not include a tent or other portable and temporary shelter which does not have any foundation.

(21) **'Building/House Line'** means a line beyond which the outer face of a building except boundary wall must not be projected in the direction of any street existing or proposed.

(22) **'Building Plans'** means the plans showing the proposed details of the arrangements of intended building works within the property line.

(23) **'Builder'** means any person having the ownership / leasehold title, project proponent, institution, company, firm, agency or government department, autonomous and semi-autonomous bodies who intend to undertake, undertake or have undertaken building works.

(24) **'Byelaws'** means laws, rules and regulations approved by the Governing Body / Executive Board / Competent Authority of Defence Housing Authority Lahore.

(25) **'Board'** means relevant Cantonment Board.

(26) **'Commercial Building'** means a building or part of a building, which is used as shops, offices, business arcade, show rooms, display centers or market for sale of merchandise for retail only, building used for transaction of business or the keeping of accounts, records for similar purposes, professional service facilities, petrol pumps, restaurants, cinemas, theatres, banks, clubs run on commercial basis. Storage and service facilities incidental to the sale of merchandise shall be included under this group, except where exempted.

(27) **'Car Porch'** means a shelter or a shed for a car, which is permanently open on at least two sides.

(28) **'Completion Certificate'** means the certificate issued by the competent Authority on the completion of construction as per approved plan.

(29) **'Commercial Zone'** means the area where the commercial buildings are located as shown in the Master Plan.

(30) **'Competent Authority'** means the Authority competent to approve and regulate building and development plans, licenses, levy charges and do so all such things as authorised under these and other rules and regulations.

(31) **'Construction'** means site excavation, erection, re-erection of a building / structure or making additions and alterations to an existing building / structure.

(32) **'Detached Building'** means a building not joined to another building on any side.

(33) **'Demarcation Plan'** means plan showing measurement and location of plot.

(34) **'Development Charges'** means amount on account of development charges is to be paid by the allottee of a plot.

(35) **'Existing Building'** means a building existing on the date of commencement of the town planning.

(36) **'Engineer/Registered Engineer'** means a qualified engineer currently registered with Pakistan Engineering Council (PEC) as an engineer.

(37) **'External Wall'** means any outer wall of a building abutting on an external or internal open space on adjoining property lines.

(38) **'Erection of Building'** means the construction of building in devolution charges premises / boundaries which may include the structural alterations for making any additions to an existing building.

(39) **'Flats/Apartments'** means a multi-storey building containing more than two apartments or block (s) / block (s) of buildings consisting of number of residential units built in horizontal or vertical manner sharing common stair case, lifts or excess spaces exclusively designed for a human habitation in the

residential zone or residential area with all necessary requirements such as kitchen, lavatory, bathroom etc.

(40) **'Folding Shelter'** means a structure made of steel tubes, fixed to pillars of the porch, having fabric covering which has the arrangement for its opening (extension) and closing using gears/handles etc. for parking of vehicles only.

(41) **'Fire Escape'** means an exit from a building, in the event of fire.

(42) **'Floor Area'** means the horizontal area of floor in a building covered with roof, whether or not enclosed by walls but excluding ancillary covered spaces and projections allowed under these regulations.

(43) **'Floor Area Ratio (FAR)'** means the total covered area of a building as permissible under these regulations divided by the area of the plot.

(44) **'Footprint'** means the portion of a plot of land covered, at ground floor level, by a building or part thereof other than basement.

(45) **'Form'** means Form appended to these regulations.

(46) **'Foundation'** means a structure entirely below the level of the ground which carries and distributes the load from pillars, beams or walls on the ground.

(47) **'Gallery'** means an open or a covered walks way or a long passage and underground passage.

(48) **'Head Room'** means the clear vertical distance measured between the finished floor level and the underside of lowest obstruction such as ceiling or rafter, whichever is lower.

(49) **'Height of Building'** means the vertical measurement from crown of the front road to the highest part of the roof.

(50) **'Height of a Room'** means the vertical distance measured between the finished floor level and under side of the ceiling.

(51) **'Kanal'** means a size of land equal to 20 marlas or 500 square yards/ 4500 square feet.

(52) **'License'** means the permission granted under these regulations by the Authority to perform the requested acts as are allowed under these and other rules and regulations of the Authority.

(53) **'Licensee'** means an individual or firm who has been duly given license by the Authority to perform the requested act as is allowed under these and other rules and regulations of the Authority.

(68) **'Pergola'** means a structure with perforated roof consisting of cross bars in the form of reinforced concrete, wood or steel etc. of which at least 50% of roof is open to sky.

(69) **'Person'** means and includes a registered person, occupant, user, tenant and a licensee of a plot, house or building.

(70) **'Plot'** means a parcel / piece of land enclosed by definite boundaries.

(71) **'Plinth'** means finished floor level of the building.

(72) **'Property Line'** means the plot boundary which separates private property from the public property or a private property from another private property.

(73) **'Public Building'** means a building used or intended to be used either ordinarily or occasionally by the public, such as offices of the Government as well as Semi Government Institutions and agencies, mosque, college, school, library, theatre for cultural activities, public concert hall, club, hospital, public exhibition hall, community centre, lecture room or any other place of public assembly.

(74) **'Place of Assembly'** (social / recreational activities). Including a building designed for use as a public hall, council /community hall, theatre, cinema, music hall, dance hall or skating ring, a building for the purpose of an exhibition of trade / industry or a building designed for use in connection with any form of amusement which is intended to be open to the public on payment of charges or a building designed for use as non-residential club or a building for any other similar use.

(75) **'Re-erection'** means the complete demolition and reconstruction of a building in defined premises / boundaries which includes the re-laying of the foundation of the building.

(76) **'Registered Architect'** means a qualified Architect registered with Pakistan Council of Architects & Town Planners (PCATP) as well as registered with the Authority.

(77) **'Registered Person'** means a person whether natural or legal, who is registered under the general regulations of the Authority.

(78) **'Regulation'** means the Defence Housing Authority construction and development regulations and other regulations made by the Executive Board.

(79) **'Reserved Area'** means an area shown in the Master Plan as such, which may be developed/re-planned by the Authority for any purpose at any stage.

(80) **'Residential Zone'** means a zone earmarked for buildings exclusively designed for human habitation and in no case shall include its use in whole or a part thereof for any other purpose e.g commercial activities, school, institution, shop, office, clinic, beauty parlour, guest house, marriage centre, gymnasium, tuition centre, club activities, work-shop, store or godown, etc. or for the purpose of political, religious and sectarian activities. It includes parks, gardens, play grounds, sector shops and other open spaces located in the area earmarked in the residential zone.

(81) **'Right of Way (ROW)'** means the area of road including shoulder / berms between two opposite boundary walls of row of houses / shops or where there are no buildings astride it, it extends up to such limits as may be prescribed by the competent Authority.

(82) **'Revised or Amended Plan'** means a previously approved drawing plan re-submitted for fresh approval with amendments in accordance with the provision of these rules / regulations.

(83) **'Scrutiny Fee'** means a fee to be determined and levied in pursuance of provisions of these regulations by Authority.

(84) **'Sector Shops'** means a row of shops excluding workshops, repairing shops and offices, to be constructed in residential zones for business related to grocery, vegetables, fruit, meat, poultry, fish and tandoors, without the provision of any open space in and

around the building, provided that the height does not exceed the prescribed limit from the road level with provision of mezzanine floor not covering more than 3/4 of the shop area.

(85) **'Septic Tank'** means a tank in which sewage is collected and decomposed before its discharge into the public / main sewer.

(86) **'Shop'** means a roofed structure primarily used for the retail sale of goods.

(87) **'Shops/Offices-cum-Flats'** means provision of shops on ground floor and basement with the facility of offices / flats on the first and subsequent floors.

(88) **'Site Plan'** means layout plan of the plot approved by the Authority in accordance with these regulations.

(89) **'Stores/Godowns'** means a building/buildings meant for storage of material or finished goods at ground floor, provided those goods are not of inflammable or objectionable characteristics and with provision of office accommodation above but does not include any garage or residential or commercial building.

(90) **'Sun/Rain Shade'** means an outer side, 2 feet wide projection from the building over a minimum height of 7 feet from the plinth level providing protection from sun/weather.

(91) **'Specified Clear Space'** means the minimum part of a plot which is to be left completely and compulsorily open to sky under the regulations, over which no structure even temporary or any integral part of the building shall be permitted.

(92) **'Special Projects'** mean land allotted / sold / allocated for a special purpose under an agreement duly approved by the Executive Board of Authority, falls in the category of "Special Projects".

(93) **'Sub-Division'** means the division of plot held under the same ownership into two plots.

(94) **'Sub-Division Plan'** means the layout plan for a proposed sub-division duly approved by the Authority as provided in these regulations.

(95) **‘Surcharge’** means amount levied on account of default in paying development charges or any other dues on due date.

(96) **‘Structural Calculations’** means detailed calculations showing sufficiency of the strength of every load bearing part of the proposed structures.

(97) **‘Semi Government Institution & Agency’** means company or corporation owned or controlled by Government or a municipal body and agency established by the Authority to perform one or more of its functions under these regulations.

(98) **‘Temporary Structure’** means a structure constructed purely on temporary basis, wholly within the plot with the approval of Authority for a specific period which shall be demolished on completion of the project or lapse of the approved period.

(99) **‘Transfer Letter’** means a letter in such form as may be prescribed by the Authority from time to time transferring the allotment of a particular property / plot from an existing owner to an applicant.

(100) **'Verandah/Arcade’** means a roofed gallery, terrace or other portion of a building with at least one side open to courtyard or a permanent open space.

(101) **'Ware House’** means a building used for storage of commercially saleable goods with appropriate office space for management use.

(102) **‘Zone'** means the area earmarked for a particular use only.

PART-II

TOWN PLANNING AND DEVELOPMENT

3. APPLICATION OF REGULATIONS AND EXEMPTIONS

a. A building plan shall be approved only for the specified purpose of the plot mentioned in the lease deed, basic agreement/or allotment letter. The number of storeys shall be as sanctioned by these regulations.

b. Every person who, within the limits of Authority, intends to carry out addition or alteration to existing building or demolish the existing building or erects or re-erects a building, shall comply with the requirements of these regulations.

c. Application of these regulations may be relaxed for buildings erected by or on behalf of the Government / Semi Government and Authority as approved by the Executive Board.

4. PLOT ADJUSTMENT

a. Maximum size of the residential plot shall be of 2 kanals (9000 Sft). The Authority shall maintain the accuracy in the measurement of the plots allocated to the registered persons. Standard sizes of residential plots shall be as under: -

(1)	2 Kanals	(a)	100 feet X 90 feet	(b)	75 feet X120 feet
(2)	1 Kanal		50 feet X 90 feet		
(3)	10 Marlas	(a)	35 feet X 64 feet	(b)	35 feet X 65 feet
(4)	9 Marlas		33 feet X 64 Feet		
(5)	8 Marlas		30 feet X 60 feet		
(6)	7 Marlas		30 feet X 52.5 feet		
(7)	5 Marlas		25 feet X 45 feet		

b. There can be non-standard plots, which are created due to adjustment in layout or re-planning of the area

c. Standard size of commercial plots shall be as under: -

(1)	32 Marlas	60 feet x 120 feet
(2)	08 Marlas	30 feet x 60 feet
(3)	04 Marlas	30 feet x 30 feet
(4)	02 Marlas	15 feet x 30 feet

d. In case the measurement of a plot is increased or decreased due to town planning or re-planning, the owner of such plot shall pay the price of extra land / claim refund according to the rates as determined by the Authority.

e. In case a corner plot allotted to a person, ceases to be as such because of the area adjustment or the re-planning or any other inevitable circumstances or reason, the person, shall be bound to accept the non corner plot and refund of the additional amount deposited for the corner plot.

5. DEVELOPMENT CHARGES

The development charges shall be worked out tentatively subject to finalization of development works and the person shall be responsible to pay the balance, if any, on completion of the development work. If the development charges or additional development charges imposed by the Authority are not paid by the person within prescribed time according to the schedule, the person shall be liable to pay a surcharge at the rate as prescribed by the Authority from time to time.

6. PHYSICAL DEMARCATION OF PLOT

Every person shall make an application to Authority (Building Control Branch) on prescribed forms for demarcation after receipt of approved drawings.

7. SUB DIVISION

a. The Authority has designed its services on the basis of one house per plot. The Authority may at its discretion allow the sub-division of two kanal plots corner or duplex house only, into two equal parts subject to payment of fee as prescribed by the Authority. Plot shall be sub-divided only after the area is fully developed and finally demarcated, provided that:

(1) The application for sub-division/additional unit shall be made on the prescribed form.
(2) All dues pertaining to the plot have been cleared. Separate water supply and sewerage connection shall be provided by the Authority on payment of prescribed charges.
(3) Original allotment / transfer letter and site plan shall be attached with the application.
(4) Paid copy of sub-division / additional unit fee shall be allowed with the application.
(5) Incase of house the applicant shall submit six prints of approved drawing for each unit with the application.
(6) Sub-division of duplex house shall only be allowed when both portions have been constructed minimum up to plinth level.

a. Corner plot of two kanal size may be sub-divided subject to the following conditions:-
(1) Separate sewer and water connection shall be obtained on payment of requisite fee.
(2) Clear spaces of one kanal shall be applicable to the sub-divided units of two kanal plots.

b. Division of duplex house, other than corner, shall be as per sketch given at Annex-A

c. Sub-division of corner plots shall be as per sketch given at Annex B.

8. AMALGAMATION

a. **Residential Plots:**
(1) The Authority may at its discretion to allow the amalgamation of 1 Kanal and 2 Kanal plots for construction of one building. Amalgamation of plots shall only be permitted, subject to payment of requisite fee as prescribed by the Authority.

(2) The maximum allowable size after amalgamation is 4 Kanal.
(3) 2 Kanal plots upto 2 plots (side to side) can be amalgamated. Foot print area of amalgamated plot (4 kanal) shall not exceed 63% of plot area.
(4) Foot Print area of 3 kanal plot shall not exceed 65% of plot area.

b. Constructed houses shall not be amalgamated. However, one house and one open plot can be amalgamated.

c. **Commercial Plots:** Amalgamation of following commercial plot sizes is allowed:-
(1) Upto 8 x commercial plots of 4/8 Marlas in a row.
(2) Upto 16 Commercial plots of 4/8 Malras (8 in front and 8 in rear).
(3) Amalgamation of sector shop is not allowed.

d. **Amalgamation of Plots / Commercial Buildings with Multiple Ownership**
Amalgamation of plots / commercial buildings allowed with multiple ownership, subject to following:-
(1) Undertaking from partners showing partnership percentage.
(2) Reversion / splitting to original plot size would not be allowed.
(3) Heavy fines in abnormal delays in completion of building due to any reason.
(4) DHA will be indemnified in case of default by any partner(s).
(5) Usage / Height clearance on case to base basis.

9. **SUB DIVISION OF AMALGAMATED RESIDENTIAL/COMMERCIAL PLOT AND FLOOR WISE SUB DIVISION OF COMMERCIAL PLAZAS**

a. **Sub Division of Amalgamated Residential/Commercial Plot**. Sub division of amalgamated plot shall be discouraged but may be permitted on payment of double fee.

b. **Floor wise Sub-Division of Commercial Plazas (4, 8, 16 Marla and Above).** Floor-wise sub-division of commercial plazas measuring 4, 8, 16 Marla and above shall be permissible, subject to the prescribed terms and conditions laid down in the DHA Standing Operating Procedure (SOP).

10. **DIGGING**

Nobody shall be permitted to dig or cut the road space including shoulders / berms without prior written permission from the Authority. Defaulters shall be liable to pay fine as prescribed by the Authority as well as making good any damages so caused.

11. **WATER SUPPLY**

a. Application for water connection shall be made on the prescribed form to the Building Control Branch. The applicant shall also be required to pay water connection fee as fixed by the Authority.

b. The applicant shall pay the charges for supply of water as per meter-reading or on flat rate as decided by the Authority.

c. Special rates for supply of water, as decided by the Authority, shall be charged at the time of new construction, addition or alteration etc.

d. In case of disconnection of water supply service by the Authority, the person shall be liable to pay monthly charges of water supply during the disconnection period, as per routine. The person shall also pay reconnection charges as prescribed by the Authority for restoration of disconnected water supply.

e. The person shall be bound to pay any arrears with penalty or fine imposed by the Authority with water supply bill.

f. No person shall be permitted to bore well / tube well / water pump / hand pump for alternative supply of water or install motor/pump directly on the water supply line in any way.

g. A person who commits any such act shall be liable to fine, penalty or both as prescribed by the Authority from time to time in addition to detachment and confiscation of such motor/ pump etc by the Authority on detection. In a case where the violation is repeated, the penalty shall be increased with subsequent disconnection; the restoration of which will also be charged to the defaulters.

h. The Authority may allow boring of shallow pump only for construction purposes and upon completion of the construction the bore shall be destroyed.

i. Separate charges shall be levied for the house having swimming pool or maintaining lawn on adjacent open plot as prescribed by the Authority.

12. **SEWERAGE**

a. On completion of construction, the Authority shall provide the facility of sewerage by connecting the building sewer with main network of sewerage system. The person shall pay connection charges as well as monthly sewerage charges as decided by the Authority from time to time.

b. The person shall construct a septic tank and maintain it effectively so that partially treated sewage flows into the main sewerage system.

c. No person shall be allowed to connect his sewerage with the main sewerage network at own. The person shall apply to the Authority for this connection, otherwise fine shall be levied as prescribed by the Authority.

d. In case of disconnection of the sewerage service by the Authority, monthly bill of sewerage shall be charged, as per routine for disconnection period. The person shall pay reconnection charges as prescribed by the Authority.

e. In case a building is occupied without the opening of water/sewer connections, a fine will be imposed as per DHA byelaws /latest approved rates until the water/sewer connections are opened. The date of sewerage opening shall be considered as two years from the date of drawing approval or the date of building occupation, whichever is earlier.

13. **CONSTRUCTION, ADDITION AND ALTERATION**

a. Every person intending to construct, re-construct erect, re-erect or make additions or alterations to a building within the area of the Authority shall comply with the requirements of these regulations.

b. Application for construction, addition, alteration, renovation and demolition of building shall be made to the Authority on the prescribed form for obtaining approval from the Authority for such erection, construction, addition, alteration or renovation.

c. No construction, addition, alteration or renovation and demolition etc. shall be allowed without prior approval of the Authority.

(1) Refundable security charges for demolition of building will be charged as prescribed by the Authority.

(2) Violation charges for demolition of building without permission from DHA will be charged as prescribed by the Authority.

d. Purchaser / Transferee including Hibba, transferee shall have a period of three years for construction of building from the date of opening of possession. However, if plot is sold within 3 years from the date of opening of possession , Non construction Penalty will not be levied till" completion of three years from date of opening of possession for 24 months from the date of transfer (whichever is later).

e. "Non Construction Penalty" will not be levied within 3 years from date of opening of possession. However, if the plot is sold after three years of opening of possession, subsequent purchaser / Hibba Transferee will be allowed 24 month grace period for construction, Non Construction penalty will be levied from date of transfer.

f. Non construction penalty will not be imposed to Shuhada.

g. Legal Heirs of any plot in DHA be considered in the same status as was the deceased member of plot.

14. DRAWINGS AND RELATED DOCUMENTS

Application for construction, addition or alteration of building shall be made to the Authority with the following documents:-

a. 1 x Tracing cloth + 5 x Ammonia Prints of Architectural drawings.
b. 2 x Structure drawings prints on tracing cloth.
c. 2 x MEP drawings on ammonia prints.
d. 2 x Fire / Safety drawings on ammonia prints.
e. Electrical Engineer's certificate.
f. Mechanical Engineer's certificate.
g. Architect Stability certificate.
h. Structure Stability certificate.
i. Form A & B (Cantt Board).
j. Photocopy of Allotment / Transfer Letter.
k. Photocopy of Site Plan issued by Bldg Con Dte in the name of current owner.
l. Photocopy of owner's CNIC.
m. Original paid challan of drawing scrutiny / vetting charges (Challan form will be obtained from Front Desk).
n. Soft copy of Architectural drawing in AutoCAD format along with 3D view (CD).
o. Irrevocable General Undertaking Resd / Cmrl on Rs. 300/- Stamp Paper (Specimen available at DHA Web Site).
p. Original soil testing / Geotechnical report (validity of report 1 year).
q. 2 x 3D view be provided with Architect Seal.

15. **BUILDING PLANS/ DRAWINGS**

The building plan/drawings, signed by registered Architect, shall be submitted by the person to Building Control Branch, indicating the following details:

a. External dimensions of the main building, with extended portions.

b. Thickness and composition of all beams / columns / lintels and other, RCC components and all other supports.

c. Schedule of open, covered and permissible areas.

d. Positions and dimensions of all projections beyond the walls.

e. Internal dimensions of all rooms.

f. Layout of water supply including construction details of underground and overhead water tanks (in MEP drawings).

g. Cross section of ramp with detail of surface water channel and driveway.

h. Layout of sewerage system with septic tank, detail of sump, collection chamber and cross section of septic tanks (in MEP drawings).

i. Schedule of steel reinforcement of roofs, beams and lintels and other RCC elements.

j. Location of kitchen grease trap and screens (in MEP drawings).

k. The level and width of the foundations and level of the ground floor and each floor with reference to the level of the center of the road on which the building abuts.

l. The dimensions of all rooms and positions of doors, windows and ventilators of each room. Schedule of doors and windows indicating sill level.

m. Overall height of building including overhead water tank, staircase, machine room for lift and parapet walls etc., if any.

n. Cross-section of boundary wall towards road.

o. Details for foundations, plinth, super structure, roof, walls up to the roof level and parapet (in structure drawings).

p. Site of the plot showing width of road & key plan of the layout of building.

q. Plan and elevation at the scale of 1 inch = 8 ft.

r. X-Sections & L-Sections at the scale of 1 inch = 4 ft.

s. A certificate from the registered Architect that all components of the building have been designed by him / her.

t. Structural stability certificate for residential buildings from the registered structural engineer, whereas for commercial buildings it should be signed by a qualified structural engineer with valid registration with Pakistan Engineering Council as consulting engineer (M. Sc Structure), with minimum 5 years' experience, shall be submitted along with building plans of multi-storey buildings.

u. The applicant shall on demand produce all necessary details of the structural designs / calculations in order to ensure the safety of the buildings.

v. Window of a commercial building cannot have opening towards adjoining residential building.

16. **SCRUTINY OF DRAWINGS AND DOCUMENTS**

a. The Authority shall scrutinize the drawings and documents within 21 working days for all residential and commercial building including:-
   (1) Building Plans.
   (2) Structural Drawings
   (3) Fire Protection Drawings
   (4) MEP Drawings
   (5) 3D views

b. The Authority may reject the application and return the drawing and documents, if plans are illegible, ambiguous or in contravention to the rules and regulations, by giving reasons in writing for such refusal and return along with guidelines for resubmission.

c. The Authority also reserves the right of rejecting the plans or suggesting any modification which though may not contravene with the rules and regulations but are injurious to health, welfare, safety and comfort of the residents and their interests.

d. The applicant may resubmit such an application after necessary modifications, corrections and rectification/removal of observations in the drawings and documents. On resubmission it shall be deemed, as if the fresh application has been submitted and a period of 21 working days for approval shall again commence from the date of resubmission.

e. After the approval, the applicant shall collect the documents in person or through attorney.

f. Any oversight in the scrutiny of documents and drawing at the time of the approval and sanction of the building plan shall not entitle the person to violate the regulations or claim any kind of damages. Similarly, as soon as any violation comes into the knowledge of the Authority, it will be pointed out to the. applicant who shall rectify it in the given time at his own risk and cost

17. **CONSTRUCTION PERIOD**

a. The person shall commence construction of the building within a period of 3 years from the date the area has been opened for possession / construction by the Authority, failing which the person shall be liable to pay non -construction penalty as prescribed by the Authority.

b. The person shall complete the building within a period of 2 years reckoned from the date of approval of the drawing by the Authority.

c. The drawing shall remain valid for two years from the date of its approval. Upon the lapse of the two year period of validity the person shall be under an obligation to obtain fresh approval.

18. **VERIFICATION OF CONSTRUCTION AT DIFFERENT STAGES**

Every registered person shall be bound to get construction verified from the Building Control Directorate at the following stages in order to avoid violations of the regulations:-

a. When the layout has been completed before starting the work.

b. On construction of the main building upto DPC Ievel.

c. Upon raising the 1st floor structure by 1 foot from the Ground floor roof slab.

d. At post grey structure.

e. On final completion before occupation at the time of getting sewer connection opened.

Note. Permission granted after the inspection of any stage does not relieve the registered person from the responsibility of keeping the construction free of all violations. If any violation is observed at any subsequent stage, the registered person shall be required to have it regularized or removed immediately upon intimation by the Authority.

19. **INSPECTION OF BUILDING AT VARIOUS CONSTRUCTION STAGES**

a. The authorized officer/staff of the Authority may inspect the premises, at any time during execution of work or after the completion without giving prior notice, to ensure the compliance of the rules and regulations and check construction violations. If the person denies inspection, the Authority may, after serving a notice, disconnect water supply and sewerage services and in addition violation charges may be imposed. Water supply and sewerage services shall be restored on payment of violation charges (if any) and restoration charges.

b. If on such inspection, it is found that the building work is in contravention to any of the regulations, the Authority shall give due notice to the person with the object of bringing the works in conformity to the approved plan or stop the work till the approval of amended/revised plan.

c. In the event of non-compliance, the work shall not be proceeded further and the Authority may order to demolish that much of the construction as it contravenes any of the regulations at the cost of the person. The Authority reserves the right to disconnect or refuse any or all the services as well as impose fine. Water supply and sewerage services shall be restored on payment of fine (if any) and restoration charges.

d. If the person is dissatisfied with the notice under regulation, the person can file an appeal before the Administrator within 15 days to reconsider the case, provided that work is suspended on filing of the said appeal and till the decision of such appeal. The Authority shall decide the said appeal after hearing the applicant within such period as consented or agreed upon.

e. If the appeal is rejected, the appellant shall be bound to rectify the violation within such period as specified in the decision made on said appeal.

20. ADDITION / ALTERATION OF BUILDINGS AFTER APPROVAL OF DRAWING

Revised drawing shall be required for approval by the Authority before execution of addition and alteration in structure of the building. The renovation, not effecting the structure of the building, may be carried out after obtaining approval from Authority.

21. DEMOLITION OF UN-APPROVED CONSTRUCTION

Construction without approval of building plan is not permitted and shall be demolished at the risk and cost of the owner.

22. CLEAR SPACES

a. Person shall have to leave the following minimum clear spaces including boundary walls for each category of plot:-

Ser	AREA	FRONT	REAR	SIDE	SIDE
(1)	**2 Kanal Plot**				
	(a) 75'x120'	20 feet – 9"	8 feet – 4½ "	5 feet – 4½"	5 feet – 4½"
	(b) 100'x90'	15feet – 9''	8 feet – 4½ "	5 feet – 4½"	5 feet – 4½"
(2)	**1 Kanal Plot**	15 feet – 9"	5 feet – 4½ "	5 feet – 4½"	5 feet – 4½"
(3)	**10 Marla Plot**	10 feet – 9"	5 feet – 4½ "	5 feet – 4½"	
(4)	**9 Marla Plot**	9 feet	5 feet – 4 ½"	4 feet- 9"	
(5)	**8 Marla Plot**	8 feet	4 feet	4 feet	
(6)	**7 Marla Plot**	7 feet	3 feet	3 feet	
(7)	**5 Marla Plot**	5 feet	3 feet	3 feet	

Note:

(1) No construction, even temporary, shall be carried out in the clear spaces except stair for basement (2.5 ft wide),underground water tank, drains, septic tank (s), sewer line and spiral steel stair at the rear if servant quarter (s) is located at the first floor. Clear spaces can not be covered by constructing pergolas etc. However, 2 feet pergola/sunshade can be extended in clear spaces at ground & first floor. At ground floor sunken area can be extended into clear spaces leaving 2.5 ft wide clear passage in case of construction of basement.

(2) Spiral steel stair shall be allowed in rear side specified clear space for roof top.

(3) No platform shall be provided with spiral stair & concrete sun shades will also not be used as platform/ landing.

b. **For Odd Shaped/Non-Standard Plots** The requirements of clear spaces shall be governed as stated below:-

(1) The open area required to be left as clear spaces on each side is to be kept clear in totality instead of uniform space from the boundary wall.

(2) The permissible area to be covered shall be built, leaving the rest as open.

(3) In case of non-standard plot, permissible covered area proportionate to the plot size may be covered leaving the rest as open space on the sides.

(4) The width of clear space on any side, for any size of plot shall not be less than 3 feet 9 inches.

c. In case of corner plot, if any member intends to keep the frontage on longer side, the specified front clear space shall be left on both the sides.

23. **MAXIMUM HEIGHT OF BUILDING**

a. Maximum height of residential building of any type shall not exceed 39 feet from crown of the road for all phases. However, height of residential building without mumtee and parapet shall be 32 feet (second floor not permitted).

b. The height of sector shop shall be restricted to a maximum of 18 feet from the crown of the road except as specified in para 23 d.

c. Maximum height of Sector Shops in all phases of DHA including Phase 4 and 6 shall be 25 feet allowing construction of basement and ground floor with mezzanine. But if a Sector Shop is already constructed in an area the new Sector Shop shall be approved as per the configuration and height of already constructed Sector Shop on case to case basis by Building Control Directorate.

d. Maximum height of sector shops in Phase-IV shall be 33 feet, allowing construction of basement, ground with mezzanine & first floor. Height of sector shops in Phase-I having plot area of 4 to 6 marla shall be 30 feet allowing construction of ground with mezzanine & first floors but without basement.

e. Maximum height of buildings in Commercial Zones shall be as under:-

Plot Size	**Phase**	**Maximum Height**	**No of Floors**
4 M	Ph-I to IV	52’	B+G+M+2F
	Ph-V & Onwards	74’/78’	B+G+M+4F
8 M	Ph-I to IV	52’	B+G+M+2F
	Ph-V & Onwards	74’/78’	B+G+M+4F
16 M	Ph-I to IV	52’	B+G+M+2F
	Ph-V & Onwards	74’/78’	B+G+M+4F**Non-Corner Plots**
	Ph-V & Onwards	100’	B+G+M+6F **Corner Plots**
32 M	Ph-I,II, IV	74’/78’	B+G+M+4F
	Ph III (XX)	150’	Subject to CAA permission & parking requirement
	Ph-V & Onwards	150’	2B+G+12F Subject to parking
48-64 M	Ph-I to IV	250’	2B+G+18F
	Ph-V & Onwards		2B+G+18F
4-6 K	Ph-I to IV	350’	2B+G+26F
	Ph-V & Onwards		2B+G+26F
> 6 K	Ph-I to IV	400’	2B+G+30F
	Ph-V & Onwards		2B+G+30F

Notes:

(1) In case of amalgamation, height of original unit shall be maintained except corner plots (having 3 sides road / parking) and with prior approval from the Authority.

(2) Extra services charges for sewerage, electric, water sup etc will be determined through a Board of Officers on case to case basis.

(3) However the maximum height in accordance to providing height of adjacent building in the vicinity.

(4) Maximum height for JV Projects in all phases will be determined in Executive board meeting in compliance with CAA permission.

24. **INSTALLATION OF SAFETY GRILL / FENCE ON ROOF IN COMMERCIAL BUILDINGS**

Construction of 6 feet high safety grill / fence or barbed wire fence with iron posts (not masonry wall) on roof top at 3 sides (except front side), for security purpose only, in Commercial Building.

25. **INSTALLATION OF TWO CAPSULE LIFTS IN COMMERCIAL PLAZAS**. The installation of two capsule lifts in DHA land commercial plazas is allowed, subject to compliance with the following regulations:-

a. **Eligibility Criteria**

(1) The commercial plaza must be located on a corner plot with all three side road access.

(2) The minimum plot size should be 32 Marla or above.

b. **Installation Guidelines**

(1) The capsule lifts must be installed on the side of the building to ensure that the front elevation remains visually appealing.

(2) The supporting structure of the capsule lift must be an integral part of the overall structural design and should be incorporated at the time of planning.

(3) Installation should not obstruct parking spaces or pedestrian movement in any way.

(4) Capsule lifts should be smart and elegant to enhance the ambiance of the commercial area.

26. **MIXED USE OF COMMERCIAL BUILDINGS (RESIDENTIAL & COMMERCIAL PURPOSE)**.

To make commercial plazas a viable business for owners, mixed use of commercial buildings is allowed, where the upper floors may be converted into residential apartments while the lower

floors remain designated for commercial activities. Property owners must obtain prior approval from DHA before initiating any such conversion. The conditions for conversion are:-

a. Only the upper two floors of a commercial building may be converted into residential apartments.
b. Each residential unit must have separate utility meters and water valves.
c. No temporary sheds for parking shall be allowed for such conversions

27. **COVERED AREAS**

a. **Residential Buildings**

(1) **Basement**. 100% of allowable covered area excluding porch area for the house without dead wall and leaving 5 feet in case dead wall exist.
(2) **Ground Floor**. Leaving specified clear spaces.
(3) **First Floor.** Covered area of first floor shall be as per table below:

Ser	Cat	Covered Area
(a)	5 Marla	100% of GF
(b)	7-10 Marla	82% of GF
(c)	1 Kanal	80% of GF
(d)	2 Kanal	78% of GF
(e)	3 Kanal	78% of GF
(f)	4 Kanal	78% of GF

(4) **Parapet Walls on Shades/Projections in Clear Spaces and Balconies on Side Spaces (Including Shades)**

(a) **5, 7 & 8 Marla plots:** 24 inches wide slab projection sun/rain shade with 12 inches drop down shall be permitted. Parapet/railing up to 36 inches shall be allowed only on the front or road facing side. No balcony shall be permitted in clear spaces.
(b) **9 Marla and above plots**: A 30 inches wide slab projection and sun/rain shade with a 12 inch drop down with 36 inches high parapet/railing shall be permitted. At first floor slab projection may be used as balcony in all clear spaces.
(c) 30 inches projection with a maximum height of 5'-6", limited to the depth of the car porch, shall be permitted on both sides of the building as roof top architectural features/design elements.

(5) The size of columns of car porch shall not be less than 9 inches x 18 inches or 12 inches diameter.
(6) Void between boundary wall and roof of car porch shall be optional. It may be blocked or provided with grill, cemented jali or louvers. However, roof of car porch shall rest on columns/beam and not on the boundary wall.
(7) The height of car porch, if resting on boundary wall, shall not be less than 9 feet and not more than the roof level of ground floor.
(8) Maximum number of porches which may rest on boundary wall:

(a) 2 Kanals - Two
(b) 1 Kanal - One (Corner plot may have two)
(c) Upto 10 Marlas - One (corner plot may have two)

(9) Maximum width of the porch shall be 9 feet. Depth of car porch shall not be less than 12 feet, excluding 2 feet projection, whereas maximum depth shall not exceed 18 feet, excluding 2 feet projection, if clear space is covered for construction of car porch.

(10) The temporary or removable extensions of car porches are allowed under the following conditions:-

(a) The far end of the cantilever extension must be at least 2 feet away from the Front Property Line.

(b) Extensions are permitted only in front of the existing car porch.

(11) In case the plot is abutting on two parallel roads an additional porch may be constructed on rear side leaving specified clear space.

***Note**:*

(1) Covering open area and pergola with fibre glass, steel structure, and asbestos cement sheet or with other similar material shall be taken as covered area.

(2) Only one temporary shade of 6 feet x4 feet is allowed in mandatory rear clear spaces for covering of washing machine etc, subject to fulfilment of safety requirement (especially fire security / fire fighting) after obtaining permission from DHA.

(3) Validation and certification of elevators installed at residential and commercial buildings shall be carried out in accordance with Annex-E, compliance of which shall be mandatory.

b. **Commercial Buildings**

(1) **Basement.** 100% of plot area leaving space for septic tank and underground water tank.

(2) **Ground Floor**. 100% of plot area with verandah.

(3) **Mezzanine Floor**. 75% of shop area excluding verandah.

(4) **First Floor & Onward**. 100% of plot area.

c. **Sector Shops**

(1) **Ground Floor** - 100% of plot area.

(2) **Mezzanine Floor** - 75% of plot area.

28. **HEIGHT OF PLINTH LEVEL ABOVE ROAD LEVEL**

a. The plinth level of the building shall not be less than 1'-6" from the crown of the adjoining road and maximum 3'-6", it can be increased upto 5'-6" in one kanal and above plots.

b. Top of ramp and clear spaces shall not be more than 12 inch higher than the crown of the front road. Ramp shall be made as per approved plan of the Authority.

29. **BOUNDARY WALL**

a. Any person who first undertakes construction of the boundary walls may construct a 9 inch thick wall using 4 ½ inch of the adjoining plots, provided the layout has been approved by the Authority. However, no space from Right of Way (ROW) of road/street shall be utilized for this purpose. The boundary walls shall be considered as common boundary walls and all neighbours shall have

rights to use it on their respective sides / top. Maximum height of boundary wall shall be 7 feet from crown of the adjacent road.

b. Installation of maximum 2 feet-6 inches high electric wire fence on common boundary wall may be erected after submitting **UNDERTAKING** regarding appropriate functionality of the electric fence and safety of neighbours. Total height of wall and security fence shall not be more than 9 feet-6 inches (7 feet + 2 feet-6 inches). Installation of concertina wire is not allowed.

c. Before starting main building, boundary walls shall be got checked at ground level.

d. The gate of the house of the corner plot shall not be provided in the chamfered portion of the boundary wall.

e. Construction of rockery / hard landscaping outside the boundary wall shall be strictly prohibited, however 2 feet wide flowerbed of small plants, parallel to boundary wall, made of bricks or other similar material, having maximum height of 6 inches, shall be permitted.

f. Coping on boundary wall towards road side may protrude upto 4 inches.

g. Common boundary wall shall not be used for construction of car porch columns. The columns shall be constructed adjacent to the boundary wall, however, roof of car porch can be extended upto plot limit.

h. In case of blood relation ownership, it is allowed to Install door or remove common boundary wall between two houses. However, in case of transfer of house (excluding Hibba Transfer), the owner will have to close the door or re-construct common boundary wall before transfer.

30. **DISPOSAL OF SURFACE WATER**

A water channel of 3 inch x 3 inch size shall be constructed outside the house as approved in the drawing. The channel shall be connected to internal septic tank of the house through a “P” trap.

31. **PROVISION OF ROCKERY / WATER FEATURES**

a. Rockery / water feature upto height of boundary wall may be constructed with front boundary wall. In case rockery/water feature is provided along common boundary wall, a gap of minimum 6 inches shall be provided between the wall and rockery/ water feature.

b. Rockery / water feature in clear spaces may be provided leaving clear passage of 2.5 ft between building & rockery / water feature and minimum 6 inches gap between common boundary wall & rockery / water feature.

32. **ROOM SIZE AND HEIGHT**

a. The minimum size of living room shall not be less than 100 Sft (minimum dimension not less than 9 feet). All rooms shall be well lit and well ventilated.

b. The height of ceiling of living rooms in residential building shall not be less than 9 feet 6 inches, whereas maximum height of ground / first floor shall be 18 feet. However, height of residential building without mumtee and parapet shall be 32 feet.

c. Height of ceiling of basement shall not be less than 9 feet and more than 14 feet (The excavation of basement shall not be more than 12’-0” with foundation from crown of the road level).

d. **Inter- Floor Spaces**

(1) Inter-floor having not more than 40% area of a liveable space, at

Ground / First Floor for residential units is allowed, with following:-

(a) 1 x inter-floor space for plot size 9 Marla to 1 Kanal, 2 x inter-floor spaces for plot size 2 Kanal and above.
(b) Minimum inter-floor clear height will be 8 feet in compliance with total permissible height of 18 feet.

(2) Closure of Inter-floor space with brick masonry, glass partition and any other similar material is not allowed, only 3'-0" high railing is allowed on upper level of inter-floor.

(3) No water supply or sewerage services shall be permitted in inter-floor space and it cannot be used as bath, kitchen, store, dressing, walk-in-closet / wardrobe, etc.

33. **STAIRCASE (MUMTEE) & MACHINE ROOM FOR LIFT**

a. **Residential Buildings**. The maximum area of machine room for lift shall be 75 sft & height shall be 45 feet from crown of road level. The height of the rest area of mumtee other than the machine room will remain same as 39 feet – 0 inches. The area of the stair mumtee shall be as under:-

(1) Upto 10 Marlas - 175 Sft

(2) 1 to 4 Kanals - 300 Sft

b. **Commercial Buildings.** The maximum area of machine room for lift shall be 75 sft & height shall be 88 feet / 92 feet from road level. The height of the rest area of mumtee other than the machine room will remain same as 74 feet / 78 feet (22 feet overhead height above roof level including mumtee & machine room). The area of the stair mumtee shall be as under:-

(1) 4 Marla - 150 Sft
(2) 8 Marlas & above - 275 Sft

Note:

(1) In case the plots are amalgamated, the area of stair / lift mumtee shall remain the same as of original plot.

(2) Stair mumty shall be designed to cover the stair area only. No living space shall be permitted. However, the following provisions are allowed:
   (a) Storage space may be created within the approved mumty area through internal partitioning using any material i.e. soft or permanent partition.
   (b) No external openings or extensions shall be allowed from the storage area."

(3) However, the maximum height of commercial buildings from road level shall be governed, keeping above in view the height of already adjacent building.

34. **SWIMMING POOL**

a. Construction of swimming pool shall not be permitted in the residential building having area less than one kanal nor on roof top of the building.

b. To ensure the privacy of swimming pool 10 feet high wall or any other arrangements as directed by the Authority be provided.

35. **Sunken Area**

a. Sunken area can be extended into clear space leaving at least 2.5 feet wide clear passage.

b. Sunken area may be allowed to be covered with a temporary lightweight structure, subject to the following limitations:

(1) The height of structure above the Passage FFL shall not be less than 1'-6" and not more than 3'-0".
(2) Minimum distance from boundary wall: 2'-6".

36. **WATER TANKS**

The person shall construct underground and over head water tanks in the house/shop and make necessary arrangements for pumping water from underground water tank to overhead water tank. The Authority shall be responsible to ensure that the water reaches underground water tank.

37. **GUARD POST / SECURITY CABIN**

a. In a residential building a guard post may be constructed having inner size of 6 feet x 6 feet with a maximum height of 8 feet from the road level adjacent to the main gate towards the lawn.

b. On production of Authorization Letter from Federal / Provincial Home Secretary, a guard post/security cabin may be placed for the prescribed duration, adjacent to the boundary wall near main gate but not utilizing more than 8 feet x 12 feet of the berm area.

38. **REQUIREMENTS OF COMMERCIAL ZONE**

a. Basement may also be constructed under verandah by leaving space on either side to accommodate underground water tank and septic tank. The level of verandah shall be kept as that of existing adjacent building (s) or as approved in the drawing.
b. The slope of verandah floor shall be 1:20 on road side.
c. The width of verandah shall be 8 feet between the wall and the outer side of verandah pillars.
d. The width of verandah for sector shop and commercial plots of 2 marla shall be 6 feet.
e. The person may construct two shops in the available frontage, after approval of drawing.
f. The person shall ensure the of the following:-
   (1) Plinth level of the shop shall be 1 feet 6 inch above the front road level for shops without basement and 3 feet 6 inch for shops with basement.
   (2) No spouts shall be provided on the top roof for drainage of water. It shall be drained through concealed pipes.
   (3) **Height of floors**
      (a) The clear height of the ground floor and mezzanine floor, including the roof/slab thickness of the mezzanine floor, shall not exceed 17'-0", comprising 8'-0" clear height for the ground floor and mezzanine floor each.
      (b) In commercial areas where no commercial building has been constructed on the adjoining plots, an additional 4'-0" combined

height may be allowed for the ground floor and mezzanine floor. In such cases, the total height including slab thickness shall not exceed 21'-0". comprising 10'-0" clear height for the ground floor and mezzanine floor each.

(c) Notwithstanding Clause (b), the plinth level of commercial buildings may be reduced from 3'-6" to 1'-6" above the road crown level to facilitate improved accessibility and provide a gentler handicap ramp gradient.

(d) The 2'-0" reduction in plinth height under Clause (c) shall be redistributed between the ground and mezzanine floor.

(e) Height of all floors excluding ground and mezzanine shall be 10 feet.

(f) Under Clause (d) & (e) to maintain 10 feet height of basement floor, foundations will be placed 2'-0" below than existing, in such cases, requisite step to safeguard structural integrity of adjoining buildings will be responsibility of owner.

g. Joining of two independent buildings / shops through inter connecting door / opening shall not be permitted.

h. 2 feet projection is allowed towards road side but no construction shall be permitted on the projection.

i. Layout of sewerage shall include grease trap, screen, manhole, septic tank etc.

j. There should be two columns in the 30 feet frontage. The size of columns may not be less than 13 ½ inches x 13 ½ inches or 13 ½ inches diameters and depth shall not be more than 24 inches.

k. Foundation shall not be permitted to extend beyond the property line.

l. Hard standing with a gradient of 1:100 (2% slope) shall be constructed sloping from road edge towards the property line, terminating into a masonry / concrete drain of 6 inches x 6 inches, covered with steel grating to receive the surface water. The drain shall be connected to the service sewer through septic tank of the building. There shall be no separation between adjacent hard standings like edging, hedges & flower beds etc.

m. Obstruction of any nature, such as steps (concrete, steel and wooden etc.) placing of flower pots, erection of any fence / structure and storage of any item in verandah of any shops / building shall not be permitted, The verandah shall be used as free passage for pedestrians.

n. Basement parking in all commercial buildings having area more than 4 kanals shall be mandatory.

o. All commercial buildings may construct toilet in the basement.

p. Sill level of windows at ground floor in corner shop on other than front road may be kept at 6 inches from finished floor level.

q. For Joint Venture / BOT projects, National Fire Protection Association, International Building Code, Uniform Building Code and International Plumbing Code shall be followed while designing the building.

r. **Safety Features - Commercial Building**

(1) All commercial buildings curtain glass wall will have tempered outer glass/application of anti shattering film or both.

(2) All commercial buildings will have CCTV cameras to cover inside and outside view with at least two weeks recording.

(3) Commercial buildings used as restaurant will ensure placing of gas cylinders at roof top. However, owner will be bound to use gas cylinder manufactured by the authorized contractor / company by OGRA (Oil and Gas Regulating Authority).

39. **PARAMETERS OF COMMERCIAL BUILDINGS CONSTRUCTED ON AREAS MORE THAN 3 KANALS**

a. **Clear Spaces:** Decided on case to case basis.

b. **Construction of Basement:** For construction of basement beyond 15 feet depth, (one basement plus lower ground floor) from road level, RCC piles along all the four sides of the plot, after leaving four feet clear space, is mandatory. The design of RCC piling will be based on the soil investigation report and the design shall be submitted along with the building plan.

c. **Width of Corridor:** Minimum width of main corridors shall not be less than 10 feet. However, corridor serving up to three shops only can have a width of 8 feet.

d. **Size of shop:** Minimum size of individual shops shall not be less than 225 Sft.

e. **Parking space:** In order to provide required parking space two or more basement can be constructed. Parking space for motor cycle at the rate of one motor cycle per 25 cars shall be provided. Sufficient space for surface parking shall also be depressed by 20 feet for entire length of on all sides facing road supported on columns / cantilever. Construction of first and onward floors up to plot line on sides facing road is permitted.

f. **Minimum Accesses:** Minimum two accesses i.e stairs or escalators (other than lifts) shall be provided by following National Fire Protection Association (NFPA) standards, if the plot size is upto 3 kanals. One additional access shall be provided for every subsequent area of 2 kanals or its fraction. In case of double basement parking or number of floors more than 3, it shall be mandatory to provide one lift / escalator access through parking basement to all the floors.

g. **Public Toilets:** Public toilets (separate for gents and ladies) shall be provided on each floor. One toilet each for ladies and gents would be mandatory for covered area of 1 kanal and its fraction.

h. **Fire Fighting / Fire Alarm System:** Latest fire fighting and fire alarm systems shall be installed in all commercial buildings.

i. **High Rise Buildings:** Maximum height of commercial building constructed on plots more than 6 kanals shall be decided by the Executive Board on case to case basis.

Note: Other byelaws pertaining to commercial buildings, not especially covered above, shall be applicable to the commercial buildings constructed on large size plots.

40. **PARAMETERS OF EDUCATIONAL INSTITUTIONS**

a. **Parking Space:** All educational institutions shall leave 20 feet wide parking space in addition to the road space (ROW) on all sides having roads. Parking shall also be provided in the basement for vehicles of the staff as approved by the Authority.

b. **Clear Spaces:** All educational institutions shall leave 30 feet clear space in front whereas 10 feet space on other three sides between the compound wall and the building line.

c. **Ventilation:** Each classroom should have at least two doors, one on each end, for better and free ventilation adequate cross/forced ventilation shall be provided on opposite sides.

d. **Lavatories:** An adequate number of lavatories (separate for girls & boys) shall be provided at each floor.

e. **Potable Water Points:** Electric water coolers / water dispensers shall be provided on required basis.

f. **Residential Accommodation:** No residential accommodation shall be built for the staff in the premises allocated for institute. However guardrooms may be constructed in the premises with the approval of the Authority.

g. **Height of Rooms:**

(1) Minimum 12 feet clear height from floor to ceiling shall be provided for main rooms such as classrooms.
(2) Height of activity rooms like halls laboratories, library etc shall be 12 to 15 feet. Height of auditorium & amphitheatres may be kept at double height.
(3) In office complex, floor to ceiling height shall not be less than 10 feet.
(4) In basement, floor to ceiling height shall not be less than 9 feet and more than 10 feet.

h. **Master plan:** Administration of the institutions shall submit a Master Plan of proposed construction, future construction and open areas along with drawing. The master plan shall clearly indicate the playing areas, which shall never be utilized for construction purposes. The assessment of such areas shall be made keeping in view the standard sizes of playground for various games.

i. **Medical Room:** A room for emergency medical treatment shall be provided.

j. **Building Height:**

(1) In Phase I to IV height of the educational institutions shall be 39 feet in residential area and 56 feet in area other than residential area.

(2) In Phase-V onward height of the educational institutions shall be 39 feet in residential area and 78 feet in area other than residential area.

k. **Grill Height:** Height of grill in front verandah at upper stories shall not be less than 6 feet. Spacing between grill rods shall not be more than 6 inches.

Note: Third and onward storeys shall not be used for junior classes.

41. **FIRE PROTECTION**

a. Building shall be planned, designed and constructed to ensure elaborate fire safety to the property and inhabitants.

b. All education institutions shall be bound to provide latest fire fighting system on each floor, indicating the location of the same in the proposed plan.

c. The thickness of all walls enclosing stair case shall not be less than 9 inches in case of brick masonry and 6 inches in case of RCC.

d. Standard fire alarm/ protection system shall be installed in all commercial, educational and public buildings.

e. Fire safety requirements for houses and commercial buildings are attached as Annex-C&D.

42. **STABILITY OF ADJACENT BUILDING**

a. No excavation, dewatering, earthwork or demolition of a building which is likely to affect the stability of adjacent building shall be allowed unless adequate steps are taken before and during the work to prevent the total or partial collapse or damage to any adjacent building.

b. Demolition of house / building is not permitted without prior approval of the Authority, defaulter may be violation charged as decided by the Authority.

43. **FILLING OF EXCAVATED SITE / INCOMPLETE BUILDINGS**

a. A site once excavated shall not be kept open and idle for a period beyond the validity period of the building plan, failing which the Authority shall not revalidate the plan and in case of any mishap the owner shall be responsible for any damage or loss to any person and property of the affectees.

b. A building once started after the approval of drawing may not be left incomplete or in abundant for indefinite period. In such cases the building plan will be invalid to start the reconstruction. Authority may take any appropriate actions to guard any mishap, safety / security hazard and pollution environment.

c. Any excavation posing threat to public safety i.e, to a person, vehicle, etc shall be appropriately marked as well as necessary protective works erected by the person, to avert any mishap. Failure to do so shall make the person liable to be penalized by the Authority, including making good any losses so caused.

44. **SUPERVISION OF DEMOLITION WORK**

The demolition of a building shall only be carried out under the supervision of a professional engineer with prior approval of the Authority.

45. **SUPERVISION**

Construction supervision and quality assurance shall be the sole responsibility of the member and his appointed architects / engineers.

46. **CONSTRUCTION VIOLATIONS**

The construction violation shall include but not limited to the following:-

a. Sewer manhole shall not be tempered for drainage of surface water.

b. Ramp slope must finish within 5 feet from the boundary wall and drive-way shall have a slope conforming to road slope towards the house.

c. Since the area outside the boundary wall is liable to be dug by the Authority for providing connection / carrying out maintenance work without intimation, therefore the person should not construct costly ramps.

d. No water points/taps shall be installed outside the commercial building as well as outside the boundary wall of the residential building.

e. Permanent / temporary fence, rockery, hedge and other such structures outside the boundary wall shall not be permitted.

f. Earth filling outside the boundary wall shall be 2 inches below the adjoining road edge and slope of the berm area towards the building. Authority reserves the right to use the berm area as and when required.

g. No permanent or temporary guard post including tents / cabins etc. shall be provided outside the boundary wall.

h. Damaging the road by mixing concrete or cutting/bending steel bars on the road, placing concrete mixer on road berm.

i. Cutting the road surface without written approval from the Authority or causing damage to the road or erecting speed breakers or any other obstruction on road.

j. Providing permanent brick soling, pavers and concreting etc along the metal road in the berm area.

k. Installation of Generator in violation of rules & regulations of Authority.

l. Any other violation which is declared as such by the Authority as per its prevailing rules and regulations.

47. **REMOVAL OR PREVENTION OF CONSTRUCTION VIOLATIONS**

a. The Authority shall carry out inspection and take appropriate measures to ensure compliance with these regulations.

b. If the Authority finds that any of the provisions of these regulations, or any rules relating thereto, or any conditions of a general or special permission, are being or have been violated, it shall serve a notice in writing on the person responsible for the violation. The notice shall indicate the nature of the violation and the Authority may order such action as it may deem appropriate to rectify the violation. In case, the construction violations are not removed / regularized within the stipulated period, the Authority may disconnect the services of the member.

c. The services shall be restored after removal / regularization of construction violation and payment of restoration charges.

48. **COMPLETION CERTIFICATE**

a. On completion of building, the member shall contact Authority for sewer / water connections before occupation of the building.

b. Occupation of building without getting the sewer/ water connections obtained from the Authority shall be liable to fine.

c. The person shall submit two ammonia copies of approved drawing; two photographs of 6 inch × 4 inch size showing front elevation of the building and 2 more for side elevation in case of corner plot, along with requisite fee for issuance of completion certificate.

d. Completion certificate shall be issued normally within 20 days, if no violation is observed and construction is found in accordance with the approved drawing. Date of sewer opening shall be treated as date of completion of the building.

e. Member is bound to obtain completion certificate within 3 years of approval of drawing, failing which fine shall be levied on monthly basis.

49. **USE OF RESIDENTIAL PLOTS**

No residential plot shall be converted into any other use except with the approval of the Executive Board.

PART-III

INSTALLATION / ERECTION OF SKY BOARD / ANTENNA /COMMUNICATION TOWER / CABLE NETWORK / NEON SIGN BOARDS

50. **INSTALLATION / ERECTION OF SKY BOARDS**. Punjab Govt has banned erection of sky boards, billboards and advertisement boards on rooftop of the buildings except in accordance with the permission from authority. Therefore, same may not be allowed in DHA without prior permission / approval.

51. **INSTALLATION / ERECTION OF ANTENNA / COMMUNICATION TOWER / CABLE NETWORK**

a. Subject to grant of permission by the Authority and payment of prescribed fee, antennas/ communication towers for transmission of data / communication etc. can be installed / erected on the rooftop of commercial buildings by the owner of the buildings. Rooftops cannot be rented out by the owner to any other person/party for installation/ erection of antenna.

b. The owner shall get the permission from the Authority prior to installation/erection of antenna/communication tower. For the purpose of obtaining permission the owner/tenant shall submit following documents with the application:-

(1) Structural drawing of the antenna.

(2) Stability certificate from a qualified structural engineer.

(3) Affidavit that owner shall compensate damages to the persons/property of others if caused due to the failure/falling of the antenna/communication tower and that the owner/tenant shall remove the antenna/communication tower without any claim/charges as and when ordered by the Authority. Affidavit shall include statement that all the formalities prescribed by different agencies of the Government for installation/erection of antennas / communication tower have been completed.

(4) Permission / Allocation of Frequency letter from Pakistan Telecommunication Authority certifying that the Firms are permitted to install such antenna / communication tower.

(5) Copies of requisite certificates obtained from different agencies of the Government including NOC from Headquarters Signals 4 Corps Lahore for installation / erection of antennas / communication tower.

c. Permission for installation/erection of antenna/communication tower shall be granted on payment of prescribed fee for one year which is extendable for another term on payment of prescribed fee subject to satisfaction of the Authority. Application for renewal shall be submitted by the owner/tenant at least one month before the date of expiry of permission, failing which the antenna/communication tower shall be removed by the Authority at the risk and cost of the owner/ tenant without serving any notice. Authority reserve the right to refuse, grant or cancel such permission already granted.

d. Red revolving/blinking light, used for warning to the aircraft etc. shall be installed on the antennas and towers and maintained around the clock. In case of failures to

ensure this, the Authority has the right to cancel the permission without notice and remove/ demolish the antenna/communication tower immediately.

Note:

i. Independent Antenna Tower with base on ground can be allowed for government/semi government organizations only and that too within their own premises and after obtaining permission from the Authority subject to payment of prescribed fee.

ii. Any antenna/communication tower more than 25 feet from rooftop shall be demolished removed by the Authority at the risk and cost of the owner.

e. Permission for installation of Cable Network shall be granted on prior payment of prescribed fee for one year which is extendable for another term on payment of prescribed fee subject to satisfaction of the Authority. Application for renewal shall be submitted by the owner/tenant at least one month before the date of expiry on permission. Authority reserves the right to refuse, grant or cancel such permission already granted, without citing any reason. Services to be disconnected of defaulters using data through Cable Network or Antenna.

52. **NEON, PLASTIC, OTHER SIGN BOARDS ON SHOPS EXCEPT DEFENCE PLAZA**

a. Shop sign boards made of flex, plastic, metal or any other material and 3D letters made of plastic/ metal etc. may be installed at the specific place such that maximum width does not exceed 4 feet. It may any how extend to full front of the shop in horizontal direction, in line with the existing shop sign board. Depth of the back lit flex board will be 8 inches while depth of 3 D letters shall not be more than 6 inches.

b. Logo display shall be allowed subject to approval and payment of charges.

c. All the shop signboard will be back lit. No light shall be installed beyond the building line to light the sign board from the front.

d. Sign boards of Basements will be adjusted on the sign boards of ground floor in such a way that 1/3 of the front of the building will be used for the basement sign board, while 2/3 will be used for ground floor sign board. In case of shops / Plazas with more than one shop on its front, the sign for basement will be adjusted on top of the stair door of the shop.

e. No flex & Vinyl / plastic sign board, bill board or advertisement board will be allowed on road side, in verandah or anywhere else in the building except the above-mentioned specified space.

f. Shop / office signboards will be installed on the front / side (for Corner Shop) of each shop with proper holding bracket and bolts. Owner / tenant will compensate damage to person / property of others if caused due to failure / falling of the sign board.

g. All the shop / office signboards shall be installed at a height at which existing sign boards of adjacent buildings are installed.

h. Sky boards will not be installed on the roof top of the building without proper permission from DHA, which will be governed by the policy on the subject.

i. If a shop owner fails to remove a signboard of unspecified size by the date mentioned in the notice issued by DHA, the same will be removed by DHA at the risk and cost of the shop owner and a fine of Rs.5000/- (Rupees Five thousand Only) will be imposed for this act. The removed signboard will be returned on payment of the fine imposed and submission of undertaking on stamp paper by the owner that the removed signboard will be used only after necessary modification as per approved policy.

j. In case of violation of DHA Policy for the second time, a fine of Rs.10,000/- (Rupees Ten Thousand Only) shall be imposed apart from confiscation of signboard.

k. No advertisement in the form of but not limited to signboard, banner, sticking paper, vinyl, flag, wall chalking etc shall be placed in and on the licensed premises/ shop without the prior approval of the Authority and if approved subject to the payment of fee/ rent levied by the Authority. Any promotional material displayed by pasting on the glass-walls of the shop shall have to be approved from the competent authority subject to the payment of fee/ rent levied as per DHA rules.

l. Damaged shop signboards shall be replaced with new signboard by the owner themselves.

m. Electric wire of appropriate size / gauge will be used for electric connections of signboards which shall be laid in proper PVC conduit. All wiring shall be fixed / secured properly to avoid any mishap.

n. Sponsored shop sign shall not be allowed to be installed without proper permission from DHA and payment of rent, as decided by DHA, shall be paid by sponsor to DHA for the period of advertisement.

o. Sign Boards shall be displayed on front side only for non-corner shops, whereas, for corner shops it can be displayed on front as well as on side of the shop.

p. Laser beams are not allowed to be fixed anywhere in commercial as well as residential areas.

q. Installation of LED Screens inside the building on payment 500/sqft/pm.

PART-IV

MISCELLANEOUS

53. WASTAGE OF CHLORINATED WATER

Wastage of Chlorinated Water: Washing of cars inside / outside the house or shop is not permitted, however cars may be cleaned using a bucket inside the walled area. A person who commits any such act shall be liable to violation charges as prescribed by the Authority from time to time. Cleaning of ramp with chlorinated water alongwith pipe is also not permitted.

54. CONSTRUCTION NOT ALLOWED

No constructions, erection, alteration and installation shall be allowed for the purposes of the following businesses in commercial areas without prior written permission of the Authority: -

a. Hotels restaurants and takeaways.

b. Auto workshops and repair shops.

c. Industrial activities.

d. Any other activity of public nuisance or environmental pollution.

55. CONSTRUCTION OF HOSPITAL / CLINIC

Hospitals, Clinics, Pet Clinics and Laboratories will not be allowed to be constructed on Commercial plots other than those earmarked for construction of such buildings in the master plan except with the permission of the Authority.

56. SPECIAL PROVISION FOR THE DISABLED PERSONS

a. Every commercial building having an area of 4500 Sft or above shall have at least one access/exit for the disabled persons, which shall be indicated with proper signage. The entrance shall be through a ramp (slope not more than 25 degrees with non-slip surface) together with stepped entry. If floor of the building is more than two steps high or the riser of step is equal to or more than 6 inches, the ramp thus provided shall start in line with the lowest steps but inside the property line.

b. Space for parking of one car at road level near the main entrance with maximum travel distance of 20 feet to the main entrance and one in the basement parking (if provided) for every 4500 Sft of area.

c. Handrail shall be provided with the ramp if the numbers of steps are more than four.

57 PRIVACY

a. The construction and erection shall be carried out on the norms of privacy of the neighbours.

b. Keeping in view the sanctity of the privacy of the neighbours, purdah wall of the servant terrace shall be kept 7 feet from the floor.

c. Sill level of servant’s quarter window shall not be less than 7 feet.

d. Servant entry in front of spiral stair at first floor shall be maximum 3 feet.

58. **GENERATOR**

Generator shall not be used as a prime source of electric supply. It may be used as standby with following conditions:-

a. **Residential**

(1) Petrol or diesel driven generators with sound proof canopy may be installed. Prior written permission from Gas Regulatory Authority shall be obtained by the member if gas driven generator is installed.

(2) Noise beyond the boundary limit shall not be more than 95 decibel. Proper arrangements for noise control shall be made.

(3) Generator can be placed in basement (subject to proper ventilation), rooftop on front side or in front lawn 5 feet away from common boundary wall. However, the generator shall not be placed in rear & side clear spaces at ground floor and terraces at first floor.

(4) The person who installs the generator will submit a stability certificate from qualified structural engineer for soundness of roof slab against the weight / vibration of the generator.

(5) The person will submit an affidavit to compensate damage to the person / property of adjoining houses if caused due to improper placement of the generator and shall remove the generator without any claim / charges as and when directed by the Authority.

(6) Access to rooftop through internal stair or spiral stair installed at rear is compulsory to install the generator on rooftop.

(7) The maximum capacity of generator shall be 25 KVA for the residential building.

b. **Commercial**. The installation of generator sets in commercial buildings on roof top shall be regulated based on plot size, as mentioned below:-

(1) **Generator Capacities**

(a) Sector Shops: 100 KVA
(b) Upto 6 Marla: 150 KVA.
(c) Upto 8 Marla: 200 KVA
(d) 16 Marla Above: 400 KVA.
(e) Capacity exceeding 400 KVA will be considered case-by-case by the competent authority.

(2) **Installation Requirement**

(a) Only diesel driven generators with soundproof canopies are allowed to minimize noise pollution.
(b) Prior approval from DHA is required before installation.

(3) **Documents Requirement**. For the purpose of obtaining permission the owner shall submit following documents with the application:-

(a) Stability certificate from qualified structural engineer for placing generator on rooftop.
(b) NOC from owner of the building.
(c) An affidavit that owner will compensate any damage to the persons / property of others if caused due to improper installation of the generator and that the owner shall remove the generator without any claim / charges as and when directed by the Authority.

59. **GRAVEYARD**

The Authority shall have the exclusive powers to develop, maintain, protect, up grade and to undertake proper maintenance and administration of the graveyards.

60. **BURIAL POLICY ELIGIBILITY FOR BURIAL**

Following categories of deceased are eligible for burial in DHA graveyard:-

a. Owner of a plot/building (residential / commercial) and his/her spouse (s).

b. Parents, mother & father and mother-in-law & father-in-law of the owner of plot / building.

c. Dependent children of the owner of plot/building as under:-

(1) Sons unmarried and dependents of any age, living in the same house.

(2) Daughters of any age who are dependent being unmarried / divorced or widow and living in same house.

61. **MISUSE OF ROOFTOP**

Area of the Authority adjacent to the Civil Aviation Airport, the following is strictly prohibited on rooftop to avoid birds hazard and reduce the risk of bird strike:-

a. To keep the bird or pet animal on the rooftop.
b. To throw / spread the food articles, food stuff, meat and other eatable articles.
c. Roosting & breeding facilities etc.

62. **CANCELLATION OF PERMISSION**

a. If at any time after permission to carryout building works has been granted and the Authority is satisfied that such permission was granted in consequence of any defective title of the applicant, material misrepresentation or fraudulent statement contained in the application made or in the plan, elevations, sections or specifications of the documents submitted therewith in respect of such building, the permission may be cancelled and any work done there under shall be deemed to have been done without the permission of the Authority.

b. The Authority may reject any plan which suggests, contains or implies any modification which may appear to contravene or contravenes any rules, regulations, policies or notifications issued by the Authority or in the opinion of the Authority appears harmful to the interest of the community / society.

63. **SPECIAL POWER OF ATTORNEY**

A registered person may execute a special power of attorney issued by the Authority, in the manner specified by the Authority, authorising a person to submit applications and receive / pay any charges / penalty / to undertake construction on his / her behalf in accordance with these regulations.

64. **UTILIZATION OF ADJACENT PLOTS AS LAWN IN CASE OF BLOOD RELATIONS**

a. **Eligibility for Lawn usage**

(1) If two adjacent plots are owned by first-blood relatives, one constructed house may use up to two adjacent empty plots as a lawn.

(2) Alternatively, if two houses are constructed on separate plots owned by first-blood relatives, a vacant plot between them may be used as a shared lawn.

b. **Restriction on Transfer**. In the event of transfer of the house or plot (excluding cases of Hibba), the following conditions must be met before the transfer:-
   (1) The door opening into the lawn must be closed
   (2) A common boundary wall must be reconstructed to separate the properties.
   (3) The lawn must be converted back into an open plot as per standard regulations

65. **GREEN ROOFTOP**

Green areas can be created on rooftop to avail roof top space for sitting purposes with following parameters: -

a. Plant's height shall not exceed 4'-0".
b. All temporary / permeant structures (optional) may be provided along the parapet wall to create an offset for ensuring privacy of neighboring properties. In case of a common wall, a minimum distance of 1'-0" shall be maintained.
c. Temporary steel structure maybe allowed over sitting area with following limitations: -
   (1) Maximum height upto 9'-0"
   (2) Covered area not exceeding 150 Sft
   (3) Covering structure shall remain semi-open from all sides and shall not constitute a permanent enclosed room it shall be lightweight, removable, and compliant with structural stability.
d. No louvers/railing will be fixed on 3 feet parapet wall.
e. Maximum height of Planter, seating bench and BarBQ counter shall not be more than 3'-0". A raised deck upto 1'-0" may be allowed.
f. Water-body with a maximum depth of 18", along with waterfall / feature wall having 4'-0" height may be allowed, subject to water proofing.
g. Member will furnish undertaking that privacy of the neighbor will not be compromised and the rooftop facility will not become a nuisance for others.

66. **INSTALLATION OF CCTV CAMERAS IN RESIDENTIAL AND COMMERCIAL BUILDINGS**

a. **Installation Requirement**
   (3) All residential buildings must install at least two (02) CCTV cameras at both ends of the front boundary wall.
   (4) All commercial buildings must install at least four (04) CCTV cameras to adequately cover entry/exit points and surrounding areas.
   (5) Corner plots both residential and commercial must install an additional CCTV camera to cover the side view and street junction, in addition to the cameras stipulated above.

b. **Maintenance and Operation**
   (1) CCTV system must be operational 24/7 and regularly maintained.
   (2) Property owners/occupants must ensure cameras remain functional at all time

c. **Footage Retention & Access**
   (1) A minimum of 10days of CCTV footage must be stored at all times.
   (2) Recorded footage must be provided to DHA Security or law enforcement agency upon request.

d. **Compliance & Penalties**
   (1) Failure to provide CCTV footage when required may be result in fines imposed by DHA.
   (2) The Authority reserves the right to conduct inspections and enforce compliance.

67. **SOLAR SYSTEM INSTALLATION GUIDELINES**

a. **General Requirements.** Solar systems shall only be procured and installed by vendors approved/authorized by the Private Power Infrastructure Board (PPIB) including work eligibility in Punjab. A complete proposal for the installation of a solar system must be submitted to DHA for scrutiny and approval before installation. The proposal must include:-

(1) Detailed design for the installation of the solar system.

(2) Placement of solar panels on rooftops with height restrictions:-

(a) **Houses of 1 Kanal & Above**

i. Upper edge at max up to 10 feet from roof.

ii. Lower edge at max up to 5 feet from roof.

b. **Houses of 5–10 Marlas**

i. Upper edge at max up to 12 feet (strictly) from roof.

ii. Lower edge varying according to available space.

iii. Inverters and solar panels must be of a Tier 1 system.

b. **Restrictions on Installation Areas**. Mumtee, Machine Room, Overhead Water Tank (OHWT) areas shall not be used for solar panel installation without prior permission from DHA. Site-specific conditions will be evaluated on a case-by-case basis, with the following general guidelines:-

(1) Upper edge height: Maximum 1 feet 6 inches from mumtee roof.

(2) Lower edge height: Maximum 2 inches from mumtee roof.

c. **Structural and Safety Compliance**. A vendor-certified report on wind and storm velocity resistance, along with seamless integration of solar panels, must be submitted. Furthermore, the following requirements are mandatory to ensure compliance:-

(1) Permanent structures (integrated into the grey structure) shall not be permitted for solar system installation.

(2) The structure shall be grounded with the roof using stainless steel (SS) anchors only. Waterproofing of the roof shall be ensured to prevent any seepage/leakage.

(3) Concrete footings shall be designed and constructed to ensure the strengthening of structural steel columns.

(4) AC/DC Earthling Mandatory for all installations.

(5) Lightning Arrester: Mandatory for all installations.

d. **Documents Required:**

(1) **LESCO NOC/Electricity bill** of property clearly mentioned DG Load.

(2) Valid copy of **PPpIB** (Private Power and Infrastructure Board) license from the concerned solar company/vendor.

(3) Solar panels Structure Stability Certificate against wind velocity from the concerned solar company/vendor (original document):-

(a) 100km/h for standard structure.

(b) 125-140km/h for elevated/customized structure.

(4) Commissioning Certificate of solar system electric / earthling / mechanical seamless integration provided by the concerned solar company/vendor (original document).

68. **PERMISSION FOR USE OF EXCAVATOR FOR EXCAVATION**

a. Owners must obtain prior permission from DHA Building Control Directorate before using excavator.

b. Apply with an undertaking on Rs 100/- stamp paper, deposit Rs 100,000/- as refundable security via challan and submit the challan receipt with the application.

c. Refund is subject to site inspection and clearance by DHA. Deduction apply for damages; excess costs must be covered by the owners.

69. **POWERS OF EXECUTIVE BOARD OR ITS AUTHORIZED OFFICER**

If the building works is commenced or carried out contrary to the provisions of these regulations/approved building plan, the Authority shall:-

a. By written show cause notice require the person, who is carrying out such building works, to stop all works forthwith.

b. If such person fails to show sufficient cause to the satisfaction of the Authority why such building works or part there of shall not be removed or altered, the Authority may take the following actions:-

(1) Require the person who has carried out the works against the provisions of these regulations/approved building plans to demolish the whole building or part thereof.

(2) In case of failure to demolish the unauthorized works, the Authority shall demolish such works at the risk and cost of the person. In case of noncompliance registration may be cancelled and premises may be taken over by the Authority.

70. **Rainwater Harvesting**. To conserve groundwater, facilitate artificial recharge and reduce surface runoff, rainwater harvesting systems shall be provided in buildings and projects as follows:-

a. **Residential Buildings**

(1) **New Buildings**. In all new buildings of one kanal and above, provision for a rainwater recharge system shall be incorporated in the drawings at the time of submission for approval, in accordance with DHA-approved criteria.

(2) **Existing Buildings.** Owners installing rainwater recharge systems in existing houses in accordance with DHA-approved criteria may be granted a 100% waiver of water and sewerage bills for one year, subject to verification and approval by the competent authority.

b. **Commercial Buildings.** Rainwater recharge systems shall be provided in commercial areas, preferably along parking areas, at locations and intervals determined by DHA.

(1) **Underdevelopment Areas**. In undeveloped areas, the provision shall be incorporated into the services development plan, and the cost may be adjusted in development charges.

(2) **Development Areas**. In developed and possession areas, DHA may arrange installation through the concerned Maintenance Office, with the cost recoverable from commercial owners in instalments as approved by the competent authority.

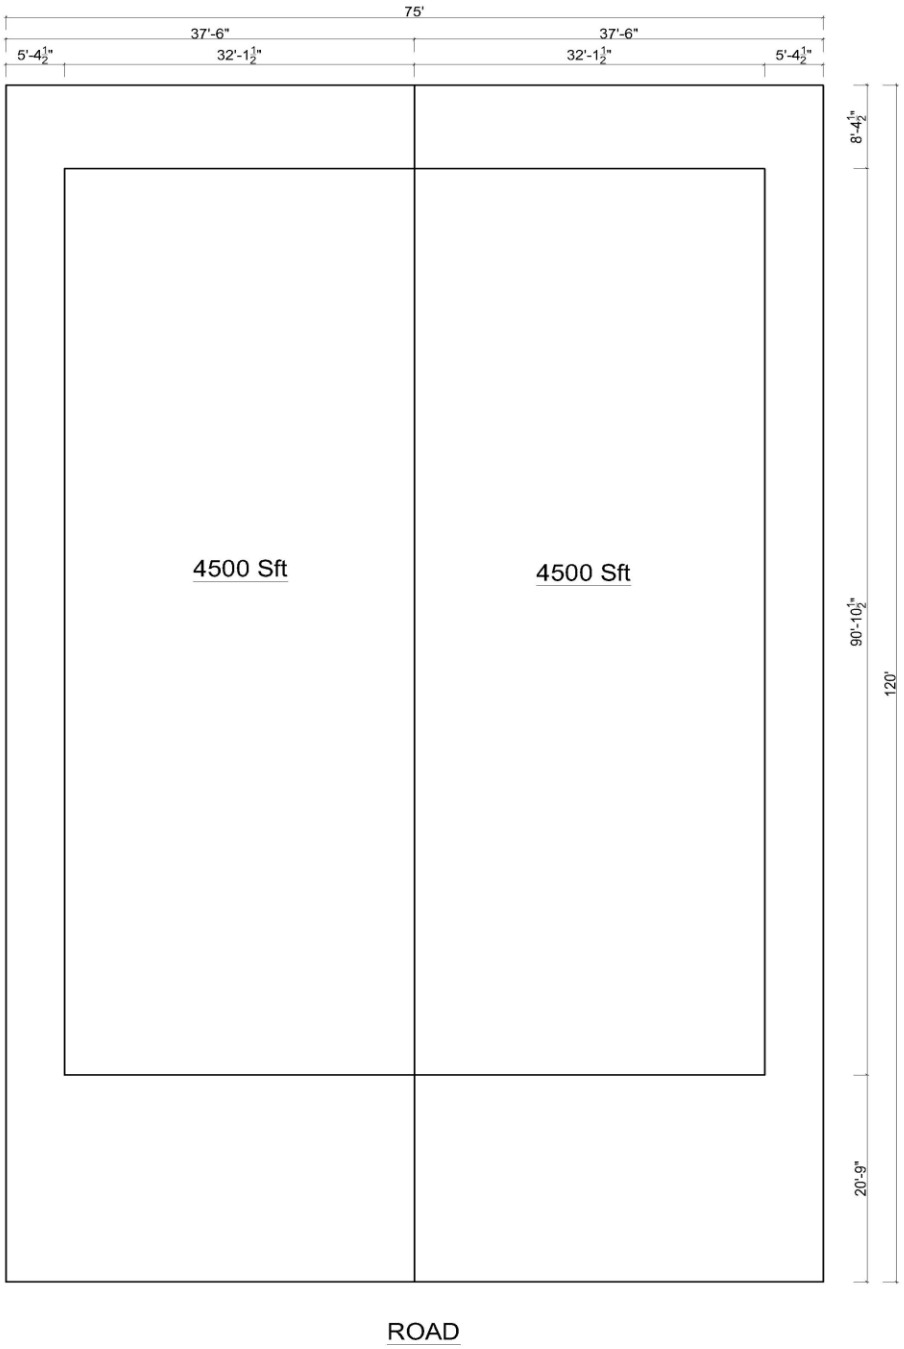

c. **Mega Projects, Joint Venture Projects and Masajid.** Provision of rainwater harvesting systems shall be mandatory and incorporated into the drawings submitted for approval.

71. **AMENDMENTS**

The Executive Board is competent and has power to amend these Regulations from time to time as it may deem necessary. The term amendment covers addition, deletion, substitution and modification of these Regulations.

FIRE SAFETY REQUIREMENTS FOR COMMERCIAL PLAZAS

Fire Safety Measures	**4 – Marla**	**6 - Marla**	**8 - Marla**	**16 - Marla**	**32-Marla**
Installation of Smoke Detector	**06** per floor in hall / open area	**08** per floor in hall / open area	**10** per floor in hall / open area	**20** per floor in hall / open area	**40** per floor in hall / open area
	At least **01** in each compartment	At least **01** in each compartment	At least **01** in each compartment	At least **01** in each compartment	At least **01** in each compartment
Installation of Emergency Exit Light	**02** per floor / **01** in staircase	**02** per floor / **01** in staircase	**03** per floor / **01** in staircase	**04** per floor / **01** in staircase	**05** per floor / **01** in staircase
Manual Call Point	**02** per floor / **01** in staircase	**02** per floor / **01** in staircase	**03** per floor / **01** in staircase	**04** per floor / **01** in staircase	**05** per floor / **01** in staircase
Fire Extinguishers (1)	**02 DCP** (6kg) on each floor	**02 DCP** (6kg) on each floor	**03 DCP** (6kg) on each floor	**04 DCP** (6kg) on each floor	**05 DCP** (6kg) on each floor
Emergency Exit (stair)	Collapsible ladder at all floors	Collapsible ladder at all floors	Iron/Steel staircase at all floors	Iron/Steel staircase at all floors	Proper emergency exit staircase
Installation of Heat Detectors	**At least 02 per kitchen** in commercial kitchens of restaurant / bakeries / cafes and **01 per 144 Sft** for additional space				
	At least 01 per kitchen in ordinary kitchens / pantry / cooking area				
Control Panel Box	At ground floor				
Exit Sign Board	Illuminated fluorescent on each floor (viewable from all corners)				
Fire Extinguishers (2)	**02 CO_2 + 02 Wet Chemical** in commercial kitchens of restaurant / bakeries / cafes				
	01 CO_2 + 01 Wet Chemical in ordinary kitchens / pantry / cooking area				
	02 CO_2 in computer / laboratory room				
	02 CO_2 or **02 Halotron** in electrical installation room. (Generator Set Fuel Tank – 1 AFFF 9 Kgs)				
Electrical DB installation	Close to main entry/exit at ground floor				
Electrical wiring for Fire Protection System	Must be run in separate conduits				
Mechanical ventilation	For basements / kitchen, duct open at roof top				
Storage of Gas cylinders	Fiber sheet, barricaded area at rooftop and not more than 36 Sft (6’ x 6’)			Fiber sheet, barricaded area at rooftop not more than 64 Sft (8’ x 8’)	
Fire alarm sounders	At least **02** at each floor			At least **03** at each floor	
Fire blankets	**02** in each building			**03** in each building	
Emergency First-Aid box	**02** in each building			**03** in each building	

IMPORTANT:

1. Installation of Fire Protection Equipment should be done using Fire resistant cable.
2. No wireless smoke/heat detectors should be installed. Smoke/heat detectors must all be connected to Fire Alarm Control Panel along with Fire Alarm Sounders and Manual Call Points.
